Getting started,

How can I put money into my account?

Your employer will pay at least 9.5% of your earnings into your superannuation. You can also supercharge your savings by making extra contributions yourself.

You can make contributions from your after-tax pay, or by salary sacrifice through an agreement with your employer to make extra payments from your salary before tax is deducted. Contact payroll to get started.

Combine your super in seconds

Are you paying fees on multiple accounts? You could save money by combining your super into one account with us. As an LGIAsuper member, it only takes a few seconds in Member online using the Find my super tool. Check out the link to find out how easy it is:

Intelligent investment options

Your super will automatically be invested in our MySuper Lifecycle option, a simple, low-cost option designed to suit most members.

If you want to engage more with your super, you can choose from a range of options that deliver consistent long-term returns, including:

- Five ready-made options
- Five single asset class options
- Two socially responsible options.

With LGIAsuper, you can mix and match options to suit your needs and switch between them at no cost. If you're not sure which option is best for you, why not try our Investment risk profiler? You'll find more details in our *Investment choice guide* and on our website at **lgiasuper.com.au**
